ALABAMA

PREMARITAL LAW (Summary)

Applicants for a marriage license must file with the Judge of Probate certificates from any licensed physician. Certificates must state that applicants have been examined for venereal disease and, in the opinion of the examining physician, are not infected or do not have venereal disease in a communicable stage. The certificates must be filed within 30 days before issuance of the marriage license. The physical examination must include a blood test for syphilis. The blood test must be performed in the laboratory of the State Board of Health or in a laboratory approved by the State Board of Health.

PRENATAL LAW

None.

LABORATORY SERVICES (Summary)

Laboratories offer the darkfield examination, spinal fluid examination, and a standard serologic test. Laboratory reports from other State boards of health are accepted provided certificate forms sent in by licensed physicians contain the same information required on Alabama certificates. This ruling also applies to Army, Navy, and U. S. Public Health Service laboratories and to City of New York and District of Columbia laboratories.

ARIZONA

PREMARITAL LAW

None.

PRENATAL LAW (Summary)

Physicians attending a pregnant woman must submit a blood sample to an approved laboratory for a standard serologic test for syphilis. Other persons legally permitted to attend pregnant women, but not allowed to take blood, must have a physician take the sample and submit it for a test. Birth and stillbirth reports must state whether or not a blood test was made and the approximate date the specimen was taken.

LABORATORY SERVICES (Summary)

Laboratory services furnished include darkfield and spinal-fluid examinations; serology-qualitative Kline; qualitative and quantitative Kahn; and smears and cultures for gonorrhea.

ARKANSAS

PREMARITAL LAW (Summary)

A 3-day waiting period is required; a physical examination and a serologic test are not required.

PRENATAL LAW (Summary)

A physician attending a pregnant woman must take, or cause to be taken, a sample of venous blood at the time of the first examination or at delivery. The sample must be submitted to an approved laboratory for a standard serologic test for syphilis. Every other person permitted by law to attend pregnant women, but not legally permitted to take blood samples, must cause a sample of blood to be taken. The sample must be taken by or under the direction of any licensed physician. It must be submitted to an approved laboratory for a standard serologic test for syphilis.

LABORATORY SERVICES (Summary)

Laboratory services furnished include serologic tests for syphilis; blood specimen and spinal fluid examinations; darkfield examinations; smears and cultures for gonococci; and tests for chancroid, granuloma inguinale, and lymphogranuloma venereum.

CALIFORNIA

PREMARITAL LAW (Summary)

Applicants for a marriage license must file with the county clerk a certificate signed by any licensed physician stating that the applicants have been examined for syphilis, and that the applicants, in the physician's opinion, do not have syphilis. If either applicant is infected, he or she must not have a disease in a stage which may become communicable. The certificate must also bear the signature of a laboratory representative who testifies in writing that a standard serologic test for syphilis has been made. The examination and serologic test must be made within 30 days prior to the date of issuance of the marriage license.

PRENATAL LAW (Summary)

A licensed physician and surgeon or other person engaged in prenatal care of a pregnant woman, or attending a woman at the time of delivery, is required to take, or cause to have taken, a blood specimen at the time of the first professional visit or within 10 days thereafter. The blood specimen must be submitted for a standard serologic test for syphilis. The laboratory to which it is sent must be approved by the State Department of Public Health. The birth certificate must include information to the effect that an examination has been made, and if not made, reasons must be given.

LABORATORY SERVICES (Summary)

Darkfield examinations, spinal fluid examinations, and neurologic examinations are furnished. Local health department laboratories are subject to State approval for syphilis serology. Only State-approved laboratories in California have the report form required for premarital examination procedure. The State laboratory supplements the combined facilities of local departments. California's premarital law permits acceptance of certificates from other States having comparable laws and State-approved laboratories; Army, Navy, and U. S. Public Health Service laboratories; health department laboratories of New York City and the District of Columbia. California State forms are required.

⁷ Gonorrhea is diagnosed but treated only on Saturdays. On other days cases are referred to the U. S. Public Health Service, Appraiser's Bldg.

COLORADO

PREMARITAL LAW (Summary)

Applicants for a marriage license must have an examination for syphilis, including a serologic test, by any licensed physician not more than 30 days prior to issuance of the license. The certificate form provided by the State Health Department must be filled out by a State or State-approved laboratory, a laboratory of the Army, Navy, Veterans Administration, or a U. S. Public Health Service laboratory. The physician's address and signature must be shown under the statement that applicants are not infected with syphilis or other venereal disease, or do not have these diseases in a communicable stage.

PRENATAL LAW (Summary)

A person attending a pregnant woman must take, or cause to be taken, a blood specimen at the time of the first visit or within 10 days thereafter. The specimen must be submitted to a State-approved laboratory for a standard serologic test for syphilis. The name of the laboratory and the date the specimen was taken must be placed in the space provided on the birth certificate of the child.

LABORATORY SERVICES (Summary)

The Kahn precipitation, quantitative, and verification tests are available only from the Central Laboratory in Denver. Darkfield examinations are available at all laboratories in the Division of Laboratories; smears and cultures are made for gonorrhea in all Division laboratories. Reports from other State health laboratories are accepted if they fulfill the requirements of Colorado law. Private laboratories are approved for Kahn, Eagle, Kolmer, and Mazzini blood tests, but this service is not free. Reports from Army, Navy, and U. S. Public Health Service laboratories are also accepted.

CONNECTICUT

PREMARITAL LAW (Summary)

Applicants for a marriage license must submit to a standard blood test within 40 days before issuance of the license. Any physician licensed to practice medicine or osteopathy in any State, Territory, or the District of Columbia may take the blood and sign the marriage certificate for use in Connecticut. The laboratory performing the test must be one approved by the State. Out-of-State laboratories approved are all central laboratories of various State health departments, the U. S. Public Health Service Laboratory at Staten Island, N. Y., and the Army and Navy Medical College Laboratories in Washington, D. C. A physician may sign the certificate for marriage if the applicants are free from or in a noncommunicable stage of syphilis. A 5-day waiting period is required.

PRENATAL LAW (Summary)

Each physician giving prenatal care to a pregnant woman during gestation must take, or cause to be taken, a sample of blood within 30 days from the date of the first examination. The sample must be submitted to an approved laboratory for a standard serologic test for syphilis. Other persons permitted to attend pregnant women, but not permitted by law to take blood, must cause a sample of blood to be taken within 30 days from the date of the first examination by a duly licensed physician. The sample must be submitted to an approved laboratory for testing.

LABORATORY SERVICES (Summary)

The Connecticut State Department of Health Laboratories perform the following tests without charge for licensed Connecticut physicians: blood tests (Mazzini and Connecticut complement-fixation); spinal-fluid examinations; darkfield examinations; smears and cultures for gonorrhea; tests for lymphogranuloma venereum; granuloma inguinale, and chancroid.

DELAWARE

PREMARITAL LAW (Summary)

Applicants for a marriage license must have a physical examination by any licensed physician, including a serologic test for syphilis, not more than 30 days prior to issuance of the license. Persons with syphilis may marry if they do not have the disease in a communicable stage. Applicants may be examined free at a health center of the Delaware State Board or City Board of Health. Marriage certificates must be accompanied by a report from the laboratory which gives the name of the test, date made, name and address of physician, and name and address of the person whose blood was tested. Results of the test, however, must not be included in the report. This information is given on regular laboratory forms. Certificates provided by other States, having comparable laws, will be accepted from persons who have been examined and who have received serologic tests for syphilis outside the State. Tests must be made not more than 30 days prior to issuance of the marriage license. Nonresidents are required to wait 4 days for the marriage license. If one or both applicants are residents, there is a 24-hour waiting period.

PRENATAL LAW (Summary)

A physician attending a pregnant woman must take a blood sample at the first examination and submit it to an approved laboratory for a standard serologic test for syphilis. Other persons legally permitted to attend a pregnant woman, but not permitted to take blood, must cause a sample to be taken by a licensed physician and submitted to an approved laboratory for a serologic test for syphilis. In reporting every birth and stillbirth, persons permitted to attend pregnancy cases and required to report births and stillbirths must state on the certificate the following information: whether or not a blood test for syphilis has been made; if no test was made, the reasons why must be stated. In no event may the birth certificate state the result of the test.

LABORATORY SERVICES (Summary)

Laboratory services of the State include spinal fluid examinations and darkfield examinations. City health department laboratories and private laboratories are certified for venereal disease serology. Reports are accepted from any other State board of health laboratory and State branch laboratories; Army, Navy, and U. S. Public Health Service laboratories; City of New York and District of Columbia laboratories.

FLORIDA

PREMARITAL LAW (Summary)

Applicants for the marriage license must file with the county judge a certificate from any licensed physician stating they have had a physical examination not more than 30 days prior to application. This examination must include a standard serologic test for syphilis. The certificate must state that applicants are not infected with syphilis or do not have the disease in a communicable stage. The certificate must include a statement from the person in charge of the State-approved laboratory. Information on this form must include the name, date, and result of the test given; and names and addresses of the physician and of applicants whose blood was tested.

PRENATAL LAW (Summary)

A physician or other person permitted by law to attend a pregnant woman must take, or have taken, a sample of venous blood at the first visit or within 10 days thereafter. If the sample is not taken prior to delivery, blood should be collected by the person making the delivery and sent to a State-approved laboratory for a standard serologic test for syphilis. Every birth and stillbirth certificate must show the date of the serological test. If no test was performed, reasons must be stated. In no case may the result of the test be shown on the birth certificate.

LABORATORY SERVICES (Summary)

Laboratory services furnished include darkfield examinations; spinal fluid serology; colloidal gold; globulin and total protein tests; blood serology; cultures for gonococci; and smears for gonococci and Donovan bodies. The State Board of Health central laboratory and branches; county, city, and private laboratories are approved by the State Board of Health for doing standard serologic tests for syphilis. Laboratory reports from other States are acceptable if they are submitted on Florida forms. These forms are supplied upon request. This also applies to Army, Navy, and U. S. Public Health Service laboratories; City of New York and District of Columbia laboratories.

GEORGIA

PREMARITAL LAW

None.

PRENATAL LAW (Summary)

The attending physician or midwife must take, or cause to be taken, a blood specimen within 30 days of the first examination. If, because of labor, it is inadvisable to take blood at the time of the examination, it must be taken within 10 days after delivery. There is a \$1 limit on the charge for taking a blood specimen. Specimens may be taken by the local health department or by the county physician. Specimens are subject to a standard State-approved serologic test for syphilis in a State-approved laboratory. The date of the test, but not the test results, must be shown on the birth certificate.

LABORATORY SERVICES (Summary)

Laboratories furnish serologic tests for syphilis, darkfield examinations, spinal fluid examinations, smears and cultures for gonococci, and biopsies. City and county health department laboratories and private laboratories are certified for venereal disease serology.

IDAHO

PREMARITAL LAW (Summary)

Applicants for a marriage license must take a physical examination by any licensed physician within 30 days of issuance of the license. The examination must include a standard serologic test for syphilis in a State-approved laboratory. The physician must certify that applicants have been thoroughly examined for venereal disease and are not infected, or, if so infected, do not have a venereal disease in a communicable stage. A standard certificate form is furnished. Forms from other States having similar requirements are acceptable.

PRENATAL LAW (Summary)

A licensed physician attending a pregnant woman must take, or cause to be taken, a sample of blood at the time of the first examination or within 15 days thereafter. The sample must be submitted to a laboratory approved by the State. A statement that a sample of blood was taken must be made on the birth certificate.

LABORATORY SERVICES (Summary)

Laboratory services are furnished by a central laboratory located in Boise and by branch laboratories in Coeur d'Alene, Lewiston, Twin Falls, and Pocatello. Standard Kahn and Kolmer tests are performed on each specimen. Quantitative tests are made upon request. Reports are accepted from any other State laboratory and from State branch laboratories (in States having similar requirements to those of Idaho); Army, Navy, and U. S. Public Health Service laboratories; City of New York and District of Columbia laboratories.

ILLINOIS

PREMARITAL LAW (Summary)

Applicants for a marriage license must be examined by any licensed physician as to the existence of a freedom from any venereal disease. Examination and tests must not precede the application for a license by more than 15 days and the license is valid for 30 days after issuance. Examination must include microscopic examination for gonococci and an approved serologic test for syphilis. Negative laboratory reports must accompany the physician's certificate of freedom from venereal diseases when presented to the county clerk.

PRENATAL LAW (Summary)

A physician or other person professionally attending a pregnant woman must take, or cause to be taken, a sample of blood for an approved serologic test for syphilis. Every report of a birth or stillbirth must state whether a blood test for syphilis was made on the mother. Results of such tests must not be included on the birth or stillbirth certificate.

LABORATORY SERVICES (Summary)

State health department laboratories perform: darkfield examinations; standard and quantitative Kahn serologic tests; Kahn verification tests (Chicago and Carbondale laboratories only); spinal fluid examination (Kahn, globulin, and colloidal gold); microscopic examinations for gonococci; gonococcal complement fixation tests (Springfield and Chicago laboratories only). Certain public and private laboratories in Illinois have been approved for venereal disease serologic testing. The Illinois Department of Public Health accepts laboratory reports from the State central and branch laboratories of all State health departments; laboratories of the U. S. Public Health Service, Army, Navy, and Marine Corps; the health department laboratories of New York City and the District of Columbia; and from the Canadian provincial health department laboratories.

INDIANA

PREMARITAL LAW (Summary)

Applicants for a marriage license must be examined by any licensed physician. The examination, which must be made not more than 30 days before the license is applied for, must include a standard serologic test for syphilis. A statement signed by a physician is required, stating whether or not the applicants are infected with syphilis; and if infected, whether or not the disease is in a communicable stage.

PRENATAL LAW (Summary)

A physician attending a pregnant woman must take, or cause to be taken, a blood sample at the time of diagnosis and submit it to an approved laboratory for a standard serologic test for syphilis. Every other person permitted by law to attend pregnant women, but not permitted to take blood specimens, must cause a sample to be taken by a licensed physician. This blood sample must be submitted to an approved laboratory for a standard serologic test for syphilis.

LABORATORY SERVICES (Summary)

Darkfield facilities are available only in private laboratories, except in Fort Wayne. Spinal fluid examinations are available in State laboratories and private-approved laboratories. Neurologic examinations are available only in the Rapid Treatment Center and in other State hospitals. Private laboratories are certified for venereal disease serology. All other State board of health central and branch laboratory reports are accepted. Army, Navy, and District of Columbia public health department laboratory reports are accepted. Indiana State forms are required.

IOWA

PREMARITAL LAW (Summary)

Applicants for a marriage license must have a physical examination made by any licensed physician, or medical officer of the armed services, within 20 days of the date of application. A certificate signed by the physician must be presented to the clerk of courts at the time of application for the license. This certificate must state that applicants are free from syphilis or, if infected, do not have a disease in a communicable stage. A standard serologic test must be made in a laboratory approved by the State Health Department in connection with the physical examination.

PRENATAL LAW (Summary)

A physician attending a pregnant woman is required to take a blood sample of the patient within 14 days of the first examination. This sample must be submitted for a standard serologic test for syphilis to the State bacteriological laboratory of the State University of Iowa or to any other laboratory approved by the State Department of Health. The results of all laboratory tests must be reported on standard forms prescribed by the Commissioner of Public Health.

LABORATORY SERVICES (Summary)

Standard serologic tests for syphilis are employed. Laboratories approved include:

State Hygienic Laboratory, Iowa City.

St. Joseph's Mercy Hospital, E. A. Fullgrabe, pathologist, Sioux City.

Methodist Hospital Laboratory, A. C. Starry, M. D., pathologist, Sioux City.

Park Hospital Laboratory, J. P. Darling, M. D., pathologist, Mason City.

Laboratory of Harold M. Morgan, M. D., Mason City.

Laboratories approved include:

Council Bluffs Clinic Laboratory, A. A. Johnson, M. D., Director, Council Bluffs.

Anna T. A. Glomset Laboratory, D. J. Glomset, M. D., Director, Des Moines.

Iowa Methodist Hospital Laboratory, R. F. Birge, M. D., Director, Des Moines.

Lutheran Hospital Laboratory, A. A. Schultz, M. D., Director, Fort Dodge.

U. S. Veterans Hospital Laboratory, Kenneth Cross, M. D., pathologist, Des Moines.

Mercy Hospital Laboratory, F. C. Coleman, M. D.,
Director, Des Moines.

Finley Hospital Laboratory, E. T. Thorsness, M. D.,
Director, Dubuque.

Reports are also accepted from other State laboratories (but not their branch laboratories) and from Army, Navy, U. S. Public Health Service, City of New York, and District of Columbia laboratories. Forms from any State having a premarital law are accepted; the physician making the examination and signing the certificate must have it notarized.

KANSAS

PREMARITAL LAW (Summary)

Applicants for a marriage license must file, not more than 30 days prior to issuance of the license, a certificate showing that a standard serologic test for syphilis was made and stating whether or not the licensed physician believes the applicants are infected with a communicable venereal disease. The period during which the certificate is acceptable is 20 days for nonresidents and 30 days for residents of Kansas. Any licensed physician may make the examination. The certificate form originates in the State or approved laboratory and gives the name of the test, date, name and address of physician, and name and address of the applicants.

PRENATAL LAW (Summary)

A physician attending a pregnant woman must, with the consent of the patient, take a sample of blood for a standard serologic test for syphilis. The test may be made by either a private-approved laboratory or the State Board of Health laboratory. The results are confidential and are not reported on birth and stillbirth forms. Reports are made on separate sheets accompanying these forms. If no test was made, the reason must be given.

LABORATORY SERVICES (Summary)

The State Board of Health laboratory performs serologic tests for syphilis, spinal fluid and darkfield examinations, gonorrhea smears and cultures, and performs serologic tests for city and county health departments. Private laboratories which meet requirements are approved for serologic testing. Laboratory reports from other States having laws comparable to those of Kansas are accepted if the test is performed not more than 20 days prior to issuance of the marriage license. Reports are accepted from Army and Navy laboratories for their personnel. Laboratory reports are also accepted from the City of New York and the District of Columbia health department laboratories. Kansas State forms are required.

KENTUCKY

PREMARITAL LAW (Summary)

Applicants for a marriage license must be examined by a physician licensed in Kentucky or by officers of the U. S. Public Health Service, Army, or Navy stationed in Kentucky. The examination must be made within 15 days before the marriage license is issued. The marriage must take place within 30 days after issuance of the license. The examination must include either a Kahn, Kline, Hinton, Eagle, or Kolmer test and a darkfield test when moist lesions are present. All laboratory tests required must be made by a laboratory approved by the State Commissioner of Health.

PRENATAL LAW (Summary)

A physician or other person legally permitted to attend pregnant women must take, or cause to be taken, a blood specimen as soon as he or she is engaged to attend the woman. In case the woman is in labor at the time the diagnosis of pregnancy is made, the specimen must be obtained within 10 days after delivery. The blood must be submitted to an approved laboratory for a standard serologic test for syphilis. The laboratory test must be approved by the State Department of Health and made by its laboratory or by a laboratory approved by it. Such a laboratory test, if made by the State, must be made without charge. Persons required to report births and stillbirths must state on each birth certificate or stillbirth certificate whether a blood test for syphilis was made during the pregnancy. If such a test was made the physician, or other person, must state the name of the test used, the date when made, and the name of the laboratory making the test. If a test was not made, the physician, or other person, must state the reason or reasons why. In no event may the result of the test be stated on the birth or stillbirth certificate.

LABORATORY SERVICES (Summary)

Services offered include: blood serology, including quantitative tests; spinal fluid examinations, including colloidal gold; and examination of gonorrhea specimens. Darkfield examinations and neurologic examinations are performed. City, county, and private laboratories are certified for venereal disease serology. Private laboratories are certified only for premarital and prenatal tests, but they may perform other types of venereal disease serology without certification. Laboratory reports from other States are accepted only if they are made by a State laboratory.

F = Females only.

R = Employee or institutional group as indicated in title of clinic.

LOUISIANA

PREMARITAL LAW (Summary)

All male applicants are required to submit to a physical examination by a licensed Louisiana physician within 15 days prior to application for the license. The necessity for a premarital blood examination lies in the discretion of the examining physician. Laboratory reports are accepted from other State board of health laboratories; their branch laboratories; Army, Navy, U. S. Public Health Service, City of New York, and District of Columbia laboratories.

PRENATAL LAW (Summary)

Physicians must offer a blood examination to pregnant women. There is no penalty for refusing and no legal accounting for the number to whom it is offered or to the number of persons who refuse it.

LABORATORY SERVICES (Summary)

Standard serodiagnostic tests for syphilis are furnished free for all physicians in the State, whether in private practice, public health work, or institutional work.

MAINE

PREMARITAL LAW (Summary)

Applicants for a marriage license, residents and non-residents, must have a physical examination, including a blood test, within 30 days before application for the license. The examination and blood test must be done by a physician licensed in Maine or by a physician licensed in another State who is a graduate of a Class A medical school. Commissioned officers in the Army, Navy, and U. S. Public Health Service may also examine and test applicants. Premarital certificates must be on Maine State blanks which have both the laboratory statement and the physician's certificate on the same form. Forms of other States are acceptable if they give

the same information with a statement, written by the examining physician, that applicants are not infected with syphilis, or if so infected, are not in a communicable stage.

PRENATAL LAW (Summary)

The physician attending a pregnant woman must take a blood sample, with her consent, and submit it to a State laboratory or to a laboratory approved by the Department of Health and Welfare. If infected, the case should be reported on the regular case report form (V-11) and the fact that the case is a prenatal one noted thereon.

LABORATORY SERVICES (Summary)

Laboratory services furnished include darkfield examinations, spinal fluid examinations, Kahn tests, Hinton tests, quantitative Kahn tests, examination of smears and cultures, and tests for other venereal diseases. All laboratories performing serodiagnostic tests are licensed and are subject to annual evaluations. Out-of-State blood specimens may be tested in the State laboratory if blood is taken and marked "premarital for Maine." All State laboratories have a supply of Maine certificates. Reports are accepted from any other State laboratory; Army, Navy, and U. S. Public Health Service laboratories; and District of Columbia laboratories.

LABORATORY SERVICES (Summary)

The Bureau of Laboratories of the Baltimore City Health Department performs serologic tests for syphilis, spinal fluid examinations, and smears and cultures for the gonococcus. There are 24 hospitals and 8 private laboratories which perform serologic tests for syphilis. Most of the hospitals and some of the private laboratories make spinal fluid examinations. Darkfield examinations are performed in the venereal disease clinics. Performances in serologic tests for syphilis are evaluated once a month by the Baltimore Bureau of Laboratories. The Bureau of Bacteriology of the State Health Department examines lesion fluids sent in from all Maryland counties for *Treponema pallidum*. Serologic tests for syphilis are run on spinal fluids and blood specimens by this Bureau. There are no "certified" syphilis laboratories in the State of Maryland.

MASSACHUSETTS

PREMARITAL LAW (Summary)

Applicants for a marriage license must submit to an examination by any registered physician, or any medical officer on active duty in any armed service, not more than 30 days before the marriage certificate is issued. Examinations must include a serologic test for syphilis in a State department of public health laboratory or in a laboratory approved by the department. A 5-day waiting period is required. If the physician discovers evidence of syphilis, he must inform applicants of the possibility of transmitting the disease. Reports of other State health laboratories and of registered physicians in other States are acceptable.

PRENATAL LAW (Summary)

The physician attending a pregnant woman is required to take a blood sample at the first examination. The sample must be submitted for a standard serologic syphilis test to a State department of public health laboratory or to one approved by the department.

LABORATORY SERVICES (Summary)

Laboratories offer darkfield examinations, spinal fluid examinations, and neurosyphilis consultations. Reports are accepted from any other State board of health laboratory; Army, Navy, and U. S. Public Health Service laboratories; and District of Columbia laboratories.

NOTE.—Under chapter 111, section 118: "No discrimination shall be made against the treatment of venereal disease in any general hospital supported by taxation" In practice, all hospitals in Massachusetts, voluntary and official, accept patients with venereal diseases. Medically indigent patients admitted to hospitals other than cooperating clinic hospitals are hospitalized without charge. The department reimburses the hospital at a rate of \$6.50 per patient day.

MICHIGAN

PREMARITAL LAW (Summary)

Applicants for a marriage license must submit to a physical examination by any licensed physician (or medical officer in the armed forces) within 30 days prior to issuance of the license. This examination must include a serologic test approved by the State commissioner of health, a darkfield test, and a microscopic test for gonococci, when indicated. It is unlawful for the county clerk of any county to issue a marriage license to persons who fail to file with the clerk a certificate stating that they are free from syphilis, gonorrhea, and chancroid. All laboratory tests required must be performed by the Michigan Department of Health or by a laboratory approved by the State Commissioner of Health. Some applicants are not free from venereal disease but have a disease in a noncommunicable stage. In such a case, applicants may apply to the commissioner of health for a certificate that states they have been qualified legally for marriage under special dispensation. This certification may be issued provided the examining physician believes the disease of one applicant would not endanger the health of the other party to the marriage. The reason for special certification must be explained to the other proposed marital partner. Applications for the license must be made on a Michigan form, which must be accompanied by the examining physician's report of his examination. This report must state results of laboratory and clinical findings and reasons why it is thought that the disease, or diseases, with which the applicant is infected is in a noncommunicable stage. Special certification for a license is issued if the woman is pregnant and if either or both applicants have a venereal disease. The Department of Health must see that such an individual secures treatment adequate to become noninfectious and to protect the unborn child. A 5-day waiting period is required. Laboratory reports are accepted from any other State board of health laboratory; their branch laboratories; from Army, Navy, and U. S. Public Health Service laboratories; and from City of New York and District of Columbia laboratories.

PRENATAL LAW (Summary)

A physician attending a pregnant woman in Michigan must take, or cause to be taken, a blood sample at the time of the first examination. This sample must be sent to an approved laboratory for a standard serologic test for syphilis. Every other person legally permitted to attend pregnant women, but not permitted to take blood, must cause a sample to be taken and submitted to an approved laboratory for a standard serologic test for syphilis. Laboratory tests required are made on request without charge by the State Department of Health. In reporting every birth and stillbirth, physicians, and others permitted to attend pregnancy cases, must state the following information on the appropriate certificate: whether or not a blood test for syphilis was made during pregnancy; the date of such test, if made; and reasons why if the test was not made. In no event may the birth certificate state the results of the test.

LABORATORY SERVICES (Summary)

The following laboratory services in the diagnosis and control of venereal disease are available free to physicians in Michigan:

Syphilis:

Blood:

Standard Kahn test.

Quantitative Kahn and complement-fixation tests upon request.

Spinal fluid:

Standard Kahn test.

Quantitative Kahn and complement-fixation tests; total protein, globulin, and colloidal gold upon request.

Gonorrhea:

Examination of stained slide preparations.

Cultures only in local areas adjacent to laboratories.

Chancroid and lymphogranuloma venereum: No routine tests.

Granuloma inguinale: Examination of slide preparations for Donovan bodies.

The State commissioner of health may establish standards for the equipment and operation of approved laboratories. He may remove a laboratory from the approved list if he thinks the laboratory is inadequately equipped or improperly operated.

LABORATORY SERVICES (Summary)

Serologic tests include: Kolmer, Kline exclusion, Kline diagnostic, Kahn standard, Hinton, Kahn, and Kolmer quantitative. Spinal-fluid tests include: Kolmer, Kline, colloidal gold, and Nonne. Cell count, quantitative protein, and sugar tests are not employed because of shipped-in specimens. Tests for gonorrhea include smears and cultures. There is no law or regulation under which the laboratories must be certified by the State Department of Health.

MISSOURI

PREMARITAL LAW (Summary)

Applicants for a marriage license must present a report of a negative serologic test for syphilis and an affidavit signed by the applicant to the effect that he or she is free from syphilis. The tests must be made not more than 15 days before issuance of the marriage license, and the license is void 10 days after issuance. If an applicant has a positive test, he must present a certificate, signed by a physician licensed in Missouri, stating that the applicant does not have syphilis; or that if the applicant is infected, the disease is not in a communicable stage.

PRENATAL LAW (Summary)

Any person who undertakes, in a professional way, the obstetrical and gynecological care of a pregnant woman must take, or cause to be taken, with the woman's consent, a specimen of blood for a standard serologic test for syphilis. Such tests are to be performed by an approved laboratory. Results of positive tests are to be reported to the local health department. Birth certificates must show whether or not tests were performed, but not the results of the tests.

LABORATORY SERVICES (Summary)

Standard serologic tests for syphilis and examinations of spreads and cultures for gonococci are performed for physicians without charge by laboratories of the Division of Health of Missouri at Jefferson City, Sikeston, and Springfield; by city health department laboratories in Kansas City and St. Louis; and by the St. Louis County Health Department laboratory at Clayton. Quantitative reports are made on request. Laboratory reports from the State central and branch laboratories of all State boards of health, the U. S. Public Health Service, Army, Navy, the health departments of the City of New York and the District of Columbia are accepted. Missouri State forms are required.

MONTANA

PREMARITAL LAW (Summary)

Applicants for a marriage license must have a physical examination and a serologic blood test for syphilis within 20 days prior to issuance of the license. Any physician licensed in any State or Territory may make the examination. A certificate, signed by the physician, stating that applicants have been examined for syphilis and have submitted to a standard serologic test for syphilis must be presented to the clerk of the district court before the license can be issued. The physician must certify that the report of the serologic test has been examined by both applicants.

PRENATAL LAW (Summary)

A blood sample of pregnant women must be submitted to an approved laboratory for a standard serologic test for syphilis. The results must be filed with the Montana State Board of Health. Each birth and stillbirth certificate must show the date such a test was made. If no such test was made, the reason must be recorded upon the certificate. Results of any such test may not be shown.

LABORATORY SERVICES (Summary)

Laboratory services offered include spinal fluid examinations; darkfield examinations; complement-fixation tests; Kolmer, precipitation, and Kahn tests for syphilis; and smears and cultures for gonorrhea. Private laboratories are certified for venereal disease serology in Montana. Reports are accepted from other State board of health laboratories and their branch laboratories; and Army, Navy, and U. S. Public Health Service laboratories.

NEBRASKA

PREMARITAL LAW (Summary)

Applicants for a marriage license are required to have a blood test for syphilis made by an approved laboratory. A medical certificate is required as a prerequisite to a marriage license. The period during which the certificate is accepted is 30 days. Any licensed physician is permitted to make the physical examinations. The blood test required is one approved by the State of Nebraska.

PRENATAL LAW (Summary)

Nebraska requires that blood samples be taken from pregnant women for standard serologic tests for syphilis and examined in an approved laboratory.

LABORATORY SERVICES (Summary)

The State laboratory offers darkfield examinations and spinal fluid examinations. One city health department laboratory and several private and hospital laboratories are approved for venereal disease serology. Laboratory reports are acceptable from all State, central, and branch laboratories; Army, Navy, U. S. Public Health Service, City of New York and District of Columbia laboratories. Nebraska State forms must be used.

NEVADA

PREMARITAL LAW

None.

PRENATAL LAW (Summary)

A physician attending a pregnant woman must make an examination for syphilis by taking a blood specimen. This specimen must be submitted to a qualified laboratory for a standard serologic test for syphilis. If syphilis is found, the woman must commence treatment under a licensed physician and must continue treatment until cured.

LABORATORY SERVICES (Summary)

The State laboratory in Reno and the Clark County Health Department in Las Vegas perform darkfield and spinal fluid examinations. St. Mary's Hospital in Reno performs darkfield and spinal fluid examinations. A committee has been appointed to investigate the qualifications of private laboratories. Laboratory reports from other State boards of health are acceptable.

NEW HAMPSHIRE

PREMARITAL LAW (Summary)

Applicants for a marriage license must submit to an examination by any licensed physician within 30 days of filing the application. A standard serologic test for syphilis is required. A statement that the applicants are not infected with syphilis or do not have syphilis in a stage that may become communicable is also required. Approved laboratories include all State health department central laboratories, official laboratories, District of Columbia, U. S. Public Health Service, Army, Navy, and New York City laboratories. There is no charge for performance of the tests. A 5-day waiting period is required. Forms of other States are accepted if the requisites equal or exceed those of the New Hampshire laboratories.

PRENATAL LAW (Summary)

A standard serologic test for syphilis is required for all pregnant women at the time of the first examination by a physician or at delivery. There is no charge for the tests.

LABORATORY SERVICES (Summary)

A standard serologic test for syphilis (Kolmer, Kahn, Hinton, Kline, or Eagle); darkfield examination; spinal fluid examination; and gonococcus smear are services offered. The State Health Department Diagnostic Laboratory at Concord and the branch laboratory at Hanover are the only approved laboratories for venereal disease serology.

NEW JERSEY

PREMARITAL LAW (Summary)

Applicants for a marriage license must have a blood test by any licensed physician not more than 30 days before issuance of the license. Reports shall be submitted on a State department of health form. Blood specimens submitted should be marked "for marriage license in New Jersey." The physician must certify that applicants are not infected with syphilis or do not have syphilis in a stage that may become communicable. A waiting period of 3 days is required.

PRENATAL LAW (Summary)

A physician attending a pregnant woman must submit a specimen of blood to an approved laboratory at the time of the first examination. He must indicate on the birth certificate the approximate date the specimen was taken. Other persons permitted by law to attend pregnant women must refer such women to a licensed physician for serologic tests for syphilis.

LABORATORY SERVICES (Summary)

Delayed darkfield examinations are available at the State department of health. Newark and Paterson City laboratories offer direct darkfield examination. Most venereal disease clinics have microscopes with darkfield attachments. Spinal fluid examinations are made by State and large city laboratories. Neurologic examinations are available at State mental hospitals and clinics under the supervision of State department institutions and agencies. Reports of all other State laboratories and State branch laboratories are accepted for premarital law. Reports should be submitted on a form supplied by the New Jersey State Department of Health. Reports are also accepted from Army, Navy, and U. S. Public Health Service laboratories; City of New York; and District of Columbia laboratories.

LABORATORY SERVICES (Summary)

The major portion of all laboratory work relating to sero-diagnosis, results of treatment of syphilis, and smear and culture examinations in the diagnosis and treatment of gonorrhea and other venereal diseases is conducted by the New Mexico State Public Health Laboratory. All of these services are made available, free of charge, to any legally authorized diagnostic and treatment source in New Mexico. Laboratory services in the field are now available through venereal disease clinics established in conjunction with district health units. All diagnostic material is sent to the New Mexico State Laboratory. Examinations for chancroid, granuloma inguinale, and lymphogranuloma venereum are made through the facilities of the New Mexico State Laboratory and the New Mexico Intensive Treatment Center.

NEW YORK

PREMARITAL LAW (Summary)

Applicants for a marriage license must submit to a physical examination by any licensed physician not more than 30 days prior to issuance of the license. The examination shall include a standard serologic test for syphilis. The physician must certify that applicants do not have communicable syphilis. Commissioned medical officers of the Army, Navy, U. S. Public Health Service, and physicians licensed in other States and in the District of Columbia may make the physical examination. Serologic reports from the following laboratories are acceptable: those approved by New York State or New York City health departments, those of the Army, Navy, and U. S. Public Health Service, those of the various States and of the District of Columbia. A 3-day waiting period is required. New York forms are preferred, but other State forms are acceptable provided they give the name and address of the applicant; a statement that a serologic test for syphilis was performed; the date the specimen was taken; and the name and location of the laboratory. The result of the serologic test must not be included in the statement. Specimens sent to the New York State Laboratory without a form must state on the request, "For premarital serologic examination." A premarital form will be furnished with the report. The physician must complete the form and the applicant must submit an affidavit stating that he is not infected with any other venereal disease.

PRENATAL LAW (Summary)

A standard serologic test for syphilis must be performed on a pregnant woman by any licensed physician at the time of the first visit. This must be done whether she is to be delivered by a physician or by any other person legally permitted to deliver a child. Acceptable laboratories are those approved by New York State and New York City departments of health.

LABORATORY SERVICES (Summary)

Laboratory services offered include darkfield examinations; spinal fluid examinations; serologic tests for syphilis; and examination of smears for the gonococcus, Ducrey's bacillus, and Donovan bodies. State health department laboratories; city and county health department laboratories; and private laboratories are certified for venereal disease serology. Reports from other laboratories mentioned above are also accepted.

NORTH CAROLINA

PREMARITAL LAW (Summary)

Applicants for a marriage license must submit to a physical examination and any standard serologic test not more than 30 days prior to application for the license. Only North Carolina certificate forms are acceptable and only physicians licensed in North Carolina may make the examination. The blood test may be made by a North Carolina approved laboratory or by any State health department or its approved local laboratories. A conditional certificate is issued when an infected applicant has completed a regular treatment course; when he or she is no longer infectious but will continue treatment; when the female is pregnant and the infected applicant will take treatment; and when both applicants are infected but will take treatment. North Carolina residents married elsewhere must comply with this law within 60 days after their return to North Carolina. Reports are accepted not only from other State laboratories and their branches but from Army, Navy, U. S. Public Health Service, City of New York, and District of Columbia laboratories.

PRENATAL LAW (Summary)

Every expectant mother is required to have a serologic test for syphilis. A blood sample must be taken, at her request, only by a duly licensed physician and submitted to a laboratory approved by the North Carolina State Board of Health for performing approved tests for syphilis. Persons unable to pay duly licensed physicians may have a blood sample taken by the county health officer or county physician and submitted to an approved laboratory for testing.

LABORATORY SERVICES (Summary)

The State Laboratory of Hygiene performs serologic tests for syphilis on specimens of blood and specimens of spinal fluid. City and county health department laboratories, hospital laboratories, and private laboratories are approved by the State Board of Health for performing serologic tests for syphilis. These laboratories must be under the direction of physicians licensed to practice medicine in North Carolina, and the serologists must demonstrate their ability to perform dependable serology.

NORTH DAKOTA

PREMARITAL LAW (Summary)

Applicants for a marriage license must file with any county judge, not more than 30 days prior to date of application, certificates from a North Dakota licensed physician stating that applicants have been given standard serologic tests and such other examinations as may be necessary for the discovery of syphilis. The certificates must state that in the opinion of the physician the applicant is not infected with syphilis, or if so infected, the disease is not in a communicable stage. No license may be granted if either applicant is infected with syphilis in communicable form; and no person who is so infected is entitled to marry.

PRENATAL LAW

None.

LABORATORY SERVICES (Summary)

Serologic tests include: Kahn precipitation, Kolmer complement-fixation, Mazzini, and Eagle flocculation. Darkfield examinations are also offered. Spinal-fluid tests include: Kolmer complement-fixation and colloidal gold. Tests for gonorrhea include microscopic examinations and cultures. State public health laboratories are located at Grand Forks and Bismarck. Laboratory reports from other State central and branch laboratories are accepted. North Dakota State forms are required.

OHIO

PREMARITAL LAW (Summary)

Applicants for a marriage license must submit to an examination by a licensed Ohio physician, or a commissioned medical officer, within 30 days of filing application. The examination must include a standard serologic test for syphilis. The test must be State-approved and is free if the patient is unable to pay. A copy of test results made in any other than a State laboratory must be forwarded to the State Department of Health. Applicants who are residents of other States must present a certificate from an officer empowered to issue marriage licenses in that State. This certificate must certify that laws of the State have been complied with and that the applicant's physical condition is such that he or she could be married in that State. Applicants from States not having a premarital law must submit to an examination and a blood test in Ohio. Application for a marriage license must be made not less than 5 days and not more than 30 days before a license can be issued.

OHIO

PRENATAL LAW (Summary)

A blood test of a pregnant woman is required at the time of the first examination or within 10 days thereafter. If her condition does not permit this prior to delivery, the test must be made as soon after delivery as the doctor deems advisable. A standard State-approved serologic test is required. In birth and stillbirth reports, physicians must state whether or not a serologic test for syphilis was made on the mother in an approved laboratory. If not, reasons must be given.

LABORATORY SERVICES (Summary)

Laboratory services include darkfield examinations for *Treponema pallidum*; all recognized or recommended serodiagnostic tests for syphilis; precipitation and complement-fixation tests, including quantitative procedures; examinations of spinal fluid specimens; determination of total protein, including cell counts and serodiagnostic and colloidal gold tests; or any other special services required in the diagnosis of venereal diseases. Local health department laboratories are approved only for prenatal serologic tests. The following local health department laboratories are approved for prenatal tests: Cincinnati, Cleveland, Cleveland Heights, Columbus, Elyria, Summit County, and Toledo. The Division of Laboratories has approved approximately 135 local laboratories in Ohio for serologic tests of premarital and prenatal specimens. These laboratories are designated as "private," "clinical," or "hospital." Reports are accepted from any other State board of health laboratory or State health branch laboratory; Army, Navy, and U. S. Public Health Service laboratories.

OKLAHOMA

PREMARITAL LAW (Summary)

Applicants for a marriage license must have a premarital examination for syphilis prior to issuance of the license. Premarital certificates are accepted for a period of 30 days. Applicants must file these certificates with the court clerk. The certificate must be signed by an Oklahoma licensed physician stating that each applicant has been given a standard serologic examination made not later than 30 days prior to the date of application for the license; and that in the opinion of the physician applicants are not infected with syphilis; or if infected, the syphilis is not in a communicable stage. A statement from the person in charge of the laboratory making the serologic test is also required.

PRENATAL LAW (Summary)

A physician attending a pregnant woman in Oklahoma shall take, or cause to be taken, a sample of blood of the woman at the time of the first examination and submit it to an approved laboratory for a standard serologic test for syphilis. Any other person permitted by law to take blood tests must cause a sample of blood to be taken by an Oklahoma physician for an approved serologic test for syphilis.

LABORATORY SERVICES (Summary)

The Oklahoma Central Laboratory, 6 branch laboratories, and 60 private laboratories are certified for venereal disease serology. Laboratory services furnished by the State include darkfield examinations and spinal fluid examinations. Oklahoma premarital law permits acceptance of laboratory reports from the central laboratories of other State health departments, New York City, District of Columbia, Army, Navy, Marine Corps, and U. S. Public Health Service laboratories. Premarital certificates must be on Oklahoma forms and signed by an Oklahoma licensed physician.

OREGON

PREMARITAL LAW (Summary)

Applicants for a marriage license must file with any county clerk certificates from a licensed Oregon physician stating that applicants are free from contagious or infectious venereal diseases and epilepsy. Certificates must be issued within 10 days prior to the date of filing and must be based on a standard blood test for syphilis. The test must be approved by the State Board of Health and must be made in an approved licensed laboratory. When necessary, smear tests for gonorrhea are also made. The State Board of Health must furnish such tests free to applicants who are unable to pay. Applicants with positive syphilis blood may receive certificates if, as a result of other clinical findings and previous treatment, the examining physician thinks that such applicants are noncontagious and noninfectious.

PRENATAL LAW (Summary)

A licensed physician attending a pregnant woman must take, or cause to be taken, a sample of blood on the first professional visit, or within 10 days thereafter. This specimen must be submitted to an approved laboratory for a standard serologic test for syphilis.

LABORATORY SERVICES (Summary)

Darkfield examinations are made. Standard serologic tests for syphilis are made including Kahn, Kline, Kolmer, and special tests employing cardiolipin antigen. Spinal fluid examinations are made including colloidal gold, cell count, and total protein tests. Lumbar punctures are performed at the U. S. Public Health Service Clinic in Portland and at the State Rapid Treatment Center there. City, county, and private laboratories are certified for venereal disease serology. Reports are accepted from any other State board of health laboratory and its branch laboratories; and from New York City and District of Columbia laboratories. Oregon State forms are required. These may be obtained from the State Board of Eugenics in Portland.

M=Males only.

R=Employee or institutional group as indicated in title of clinic.

N=Negroes only.

C=Children only.

F=Females only.

² Complicated cases of gonorrhea only.

PENNSYLVANIA

PREMARITAL LAW (Summary)

Applicants for a marriage license must submit to a physical examination by a licensed Pennsylvania physician or by a medical officer of the Army, Navy, or U. S. Public Health Service. The examination must be made within 30 days of issuance of the marriage license. Both private and public laboratories must be approved by the State Department of Health. The Department has also approved laboratories operated by other State boards of health, New York City, Baltimore, the District of Columbia, and the Army, Navy, and U. S. Public Health Service. The Pennsylvania premarital form must be used by the laboratory or by the physician who makes the statement to the license court. A 3-day waiting period is required.

PRENATAL LAW (Summary)

Physicians who attend, treat, or examine a pregnant woman must take, or cause to be taken (unless the woman dissents), a blood sample within 15 days of the examination. This sample must be submitted to an approved laboratory for a standard serologic test. If the pregnant woman is attended by some person other than a physician, it is the responsibility of that person to see that a blood test is made, unless the woman dissents. Persons required to make reports of birth must state on the certificate whether or not a blood test was made. If made, the date of the test must be stated.

LABORATORY SERVICES (Summary)

The State Department of Health furnishes a comprehensive laboratory service to all physicians in the State. Darkfield examinations are available to the larger clinics. Such examination is made either by the clinic itself or in a nearby hospital. In small isolated clinics, fluid from suspected chancres is collected in capillary tubes and is forwarded to the State laboratory. State and private laboratories that meet requirements are approved by the State Department of Health for prenatal and premarital serologic testing.

RHODE ISLAND

PREMARITAL LAW (Summary)

Applicants for a marriage license must furnish the town or city clerk with a statement to the effect that applicants have submitted to a Wassermann, Kahn, or similar standard blood test. The statement, based on examinations made not more than 40 days before making application for a license, must be signed by a licensed Rhode Island physician (commissioned medical officers of the armed forces may conduct examinations for service men and women) and must declare applicants free from syphilis or gonorrhea in any communicable stage. A form provided by the State Department of Health must be used. The statement must be accompanied by a record of a standard laboratory blood test performed in the State Department of Health or in a laboratory approved by it. A 5-day waiting period for out-of-State brides is required.

PRENATAL LAW (Summary)

A physician engaged in prenatal attendance of a pregnant woman must take a blood specimen within 30 days after his first visit. The specimen must be submitted to the laboratory of the State Department of Health or to a laboratory approved by the Department. A Wassermann or other standard laboratory blood test for syphilis must then be made.

LABORATORY SERVICES (Summary)

Laboratory services include darkfield examinations, serologic tests for syphilis, gonorrhea smear-culture examinations, and smears and cultures for Ducrey's bacillus. Spinal fluid examinations for syphilis are performed. Municipal, hospital, and private laboratories are certified for venereal disease serology. Laboratory reports from other States are accepted provided the laboratories are State-approved. Reports from Army, Navy, and Marine hospitals are also accepted as well as reports from U. S. Public Health Service laboratories, New York City, and District of Columbia laboratories. In addition, reports are accepted from large municipal or hospital laboratories on "approved" lists of other States are accepted.

SOUTH CAROLINA

PREMARITAL LAW

None.

PRENATAL LAW (Summary)

Physicians attending pregnant women for conditions relating to their pregnancy, either during the period of gestation and/or at delivery must take, or cause to be taken, a sample of blood at the time of the first examination or within 3 days thereafter. This sample must be submitted to an approved laboratory for a standard serologic test for syphilis. Any other person permitted by law to attend pregnant women, but not permitted to take blood samples, must cause a sample of blood to be taken by a licensed physician, registered nurse, or laboratory technician authorized to take blood. This sample must then be submitted to an approved laboratory for a standard serologic test for syphilis.

LABORATORY SERVICES (Summary)

Several of the county health departments have small laboratories in which darkfield examinations, urinalyses, etc., are performed, and in which miscellaneous smears are examined. Such tests are performed upon request. There are no city or county health department laboratories or private laboratories in the State of South Carolina that are certified for venereal disease serology.

CLINICS FOR FOREIGN SEAMEN

No special clinics are operated for foreign seamen. However, foreign seamen will be accepted for treatment in clinics with the other patients.

¹ When service is limited, restrictions are indicated as follows:
W = Whites only. A = Adults only.
N = Negroes only. C = Children only.

M = Males only.
F = Females only.

R = Employee or institutional group
as indicated in title of clinic.

SOUTH DAKOTA

PREMARITAL LAW (Summary)

Applicants for a marriage license must have an examination by any licensed physician, including a standard blood test for syphilis. Examinations must be made within 20 days of the date of application for the license. Blood tests may be made in any laboratory approved by the State Board of Health. Certificates are not required if the woman is pregnant and presents a physician's affidavit to that effect.

PRENATAL LAW (Summary)

Physicians examining pregnant women are required to submit blood specimens for a standard blood test for syphilis at the date of the first examination. Blood tests may be made in any laboratory approved by the State Board of Health. The physician is required to indicate on every birth and stillbirth certificate whether or not a blood test was made; if no test was made, reasons for not doing so must be given.

LABORATORY SERVICES (Summary)

The State furnishes free darkfield examinations, Kahn and Kolmer tests on blood and spinal fluids, and colloidal gold tests on spinal fluids. Local health department laboratories and private laboratories are certified by the State for venereal disease serology. Laboratory reports from other States are acceptable if the laboratory is approved by its own State Health Department. Army, Navy, and U. S. Public Health Service laboratory reports are accepted. New York City and District of Columbia health department laboratory reports are also accepted. In all cases, South Dakota State forms must be used.

City and County	Facility Name and Mailing Address	Days and Hours of Service	Service to ¹	Treatment		Fee System
				Syph- ilis	Gonor- rhea ²	
Rapid City, Pennington County . . .	City-County Health Department . .	During Health De- partment Hours.	All	x	x	Free.
Sioux Falls, Minnehaha County . . .	City-County Health Department . .	During Health De- partment Hours.	All	x	x	Free.

RAPID TREATMENT CENTER

Rapid treatment for syphilis is furnished in all general hospitals in the State desirous of cooperating. The State Board of Health furnishes penicillin and pays the hospital per diem on the basis of a statement of reimbursable costs submitted by the hospital. A maximum of 14 days' hospitalization is authorized. Physician's fee is paid by the patient.

¹ When service is limited, restrictions are indicated as follows:

W = Whites only.

A = Adults only.

M = Males only.

R = Employee or institutional group
as indicated in title of clinic.

N = Negroes only.

C = Children only.

F = Females only.

² Penicillin is furnished free to physicians for all reported cases of gonorrhea.

TENNESSEE

PREMARITAL LAW (Summary)

Applicants for a marriage license are required to have a physical examination by any licensed physician and a standard laboratory blood test for syphilis. To be valid such a test must be made not more than 30 days before issuance of the license. Certificates based on these tests are issued by the State Department of Public Health of Tennessee. If, upon inquiry of the physician, either applicant for a marriage license presents a history of gonorrhea or chancroid, the physician must make, or cause to be made, a physical examination, including necessary laboratory tests in order to determine the presence or absence of venereal diseases.

PRENATAL LAW

None.

LABORATORY SERVICES (Summary)

The Tennessee Department of Public Health Central Laboratory and its five branch laboratories furnish diagnostic and serologic service to private physicians, hospitals, and health department clinics. Laboratory reports are accepted from any other State health department central laboratory; from Army, Navy, and U. S. Public Health Service laboratories; and from the District of Columbia health department laboratory. Tennessee State forms are required.

TEXAS

PREMARITAL LAW (Summary)

Only male applicants for a marriage license are required to have a physical examination by any licensed physician. Performance of serologic examinations is left entirely up to the examining physician. To be valid, such examination must be made not more than 30 days before issuance of the license.

PRENATAL LAW

None.

LABORATORY SERVICES (Summary)

The State Department of Health offers the following laboratory services: serologic examinations, spinal fluid examinations, darkfield examinations, and smears and cultures for gonorrhea. An evaluation study for the serodiagnosis of syphilis is conducted throughout the year for public and private laboratories. No certification is made. In conjunction with local health units, the State Department of Health operates regional laboratories. Other State board of health laboratory reports are accepted.

UTAH

PREMARITAL LAW (Summary)

Applicants for a marriage license must have a physical examination by any licensed physician and a serologic test by an approved laboratory not more than 30 days prior to the date of issuance of the license. Applicants must have a certificate signed by the physician and by a representative of the laboratory. Any standard test for syphilis is accepted from any approved laboratory in any State having a premarital law.

PRENATAL LAW (Summary)

A physician attending a pregnant or recently delivered woman must take, or cause to be taken, a blood sample at the first examination or within 10 days thereafter. The sample shall be submitted to an approved laboratory for a standard serologic test. Physicians must state on birth certificates whether or not a standard test for syphilis was made on the mother's blood and the approximate date of the test.

LABORATORY SERVICES (Summary)

Specimens of blood, spinal fluid, and material from lesions (darkfield examination) are examined by the State laboratory. All tests for syphilis and gonorrhea are run by the laboratory groups. All city, county, and private laboratories in the State which pass the examination are certified for venereal disease serology. Reports are accepted from any approved laboratory in any State having a premarital law; from Army, Navy, and U. S. Public Health Service laboratories; City of New York and District of Columbia laboratories.

VERMONT

PREMARITAL LAW (Summary)

Applicants for a marriage license must submit to a complete physical examination which must include a serologic blood test for syphilis. Applicants must file a medical certificate with the town clerk stating that they have submitted to this examination and that, in the opinion of the examining physician, they are not infected or do not have the disease in a communicable stage. The certificate must also contain a statement from the person in charge of the laboratory making the test or some other authorized individual. The names and addresses of persons whose blood was tested, the name of the test, and the date it was completed must be included on the certificate. The detailed report of the tests is not submitted on the certificate. It is sent on a separate form to the physician who examined the patients. The above certificate is acceptable for 30 days after the examinations are made. The marriage license is legal for 60 days thereafter. A 5-day waiting period is required except for members of the armed services. Out-of-State forms are accepted from any other State board of health laboratories, their branch laboratories, Army, Navy, U. S. Public Health Service laboratories, or from New York City and District of Columbia laboratories.

PRENATAL LAW (Summary)

A practitioner of medicine and surgery or osteopathy attending a pregnant woman must take a blood sample prior to the third month of gestation, if possible. The sample must be submitted to a laboratory approved by the State Board of Health for a standard serologic test for syphilis. The person required to file the certificate of birth must state on the certificate whether or not a blood test for syphilis was made on the mother's blood. The date of such a test must be recorded. If the mother is infected with syphilis, she must submit to a regular treatment by her physician until discharged by him. A person who willfully refuses to submit to prescribed treatment must be reported at once to the State's attorney for immediate prosecution.

LABORATORY SERVICES (Summary)

Laboratory services include the darkfield and spinal fluid examinations. Eagle, Wassermann, and Kahn tests are serologic tests offered. Colloidal gold tests are also run. Provision is made for approval of State laboratories for venereal disease serology. The State Laboratory of Hygiene is the only laboratory so approved by the State Board of Health.

BED CONTRACT FACILITIES

Private contracts are made with any hospital in the State that will accept a case for syphilis treatment under the \$75 allotment as allowed by the Communicable Disease Division. Fifteen dollars is allowed for gonorrhea. In each instance the Division executes a contract with the hospital for the individual case. All indigents are treated for syphilis and gonorrhea free of charge.

OTHER FACILITIES

Individual arrangements are made between private physicians and the Communicable Disease Division for the furnishing of penicillin in oil and beeswax. This applies for the treatment of any case reported by a physician upon request. All indigents are treated for syphilis and gonorrhea free of charge.

VIRGINIA

PREMARITAL LAW (Summary)

Applicants for a marriage license must submit to any standard serologic test for syphilis by any licensed physician within 30 days of issuance of the license. Blood specimens must be examined by the Virginia State Health Department Laboratories; by any Virginia laboratory approved by the State Health Commissioner; by any other State laboratory; or by any Federal laboratory. Reports are accepted from any other State laboratory; or by any Federal laboratory. Reports are accepted from branch laboratories of only New York, Maryland, and Pennsylvania. If the blood tests are positive, the physician is required to repeat the tests and to make a complete examination of the applicants before definite diagnoses of syphilis are made. Persons infected with syphilis may marry in Virginia if both parties are notified by the physician that either one, or both, is infected. Also, they must agree to take treatment for as long as deemed necessary by the State Health Commissioner. Persons contemplating marriage in Virginia, but residing out of State at the time, may be examined out of State. Requirement for such persons: he or she must obtain the necessary papers for examination in advance from the Virginia State Health Department. Should either or both persons be infected, treatment must be taken if they plan to reside in Virginia.

PRENATAL LAW

None.

LABORATORY SERVICES (Summary)

The Virginia State Health Department Laboratory at Richmond performs qualitative and quantitative serologic tests, darkfield and spinal fluid examinations, and smears for gonorrhea. Laboratory reports received from other State boards of health, if performed by their State laboratory, are acceptable.

WASHINGTON

PREMARITAL LAW

None.

PRENATAL LAW (Summary)

Physicians attending pregnant women are required to obtain a sample of blood at the time of the first examination. This sample must be submitted to a laboratory approved by the State Director of Health for the performance of a standard serologic test for syphilis. Women found infected are required to begin an accepted course of treatment at once.

LABORATORY SERVICES (Summary)

Laboratory services include darkfield and spinal fluid examinations; serologic tests for syphilis; smears and cultures for gonorrhea. City health department, county health department, and private laboratories are examined and approved for syphilis serology.

WEST VIRGINIA

PREMARITAL LAW (Summary)

Applicants for a marriage license must submit to a physical examination by any licensed West Virginia physician not more than 30 days prior to the date of such an application. The examination must include a standard serologic test for syphilis. Applicants must file a certificate with the clerk of the county court in the county in which the bride usually resides. This certificate must state that in the opinion of the examining physician the applicants do not have syphilis, or, if so infected, do not have the disease in a stage which may later become communicable. A 3-day waiting period is required. The day of the application shall be counted as the first day, but 2 full days shall elapse after the day of filing before issuance of the license.

PRENATAL LAW (Summary)

Every pregnant woman in West Virginia must have a blood sample taken and submitted to the West Virginia Hygienic Laboratory (or other approved laboratory) where a standard serologic test for syphilis must be performed. A physician attending a pregnant woman in West Virginia must acquaint her with the provisions of this article. He must also take, or cause to be taken, a specimen of blood from such a woman. This specimen must be submitted to the State laboratory (without charge) or to another approved laboratory. Upon request, it shall be the duty of the county and district health officers to draw blood specimens from pregnant women for these tests without charge. If there is no such officer in this area, the State health department must assume this responsibility. Every physician must state on each birth or stillbirth certificate whether or not a blood test for syphilis was performed during the pregnancy of the mother.

LABORATORY SERVICES (Summary)

Laboratory services offered include darkfield examinations; qualitative and quantitative serologic tests for syphilis; spinal fluid examinations, including a quantitative serologic test for syphilis; total protein determination; colloidal gold reaction; and cell counts. Microscopic examinations for the gonococcus; delayed cultures on special request; examinations for Donovan bodies; and other miscellaneous examinations are performed. The West Virginia State Hygienic Laboratory annually evaluates and approves all county, city, and private laboratories qualified and certified to perform venereal disease serology. Reports are also accepted from official laboratories (central and branch) of other State health departments, Army, Navy, and U. S. Public Health Service laboratories, and the District of Columbia Health Department laboratories.

WISCONSIN

PREMARITAL LAW (Summary)

Applicants for a marriage license must present a licensed physician's certificate showing that Wassermann tests were made and that the findings were negative. In addition, the male applicant must have a physical examination and must present a physician's certificate showing that he is free from venereal disease. These certificates must not be dated more than 15 days prior to the date of application for the license. Application for a marriage license shall be made not less than 5 days before the license is issued.

PRENATAL LAW

None.

LABORATORY SERVICES (Summary)

The State Laboratory of Hygiene at Madison and the Milwaukee City Laboratory perform darkfield examinations and blood and spinal fluid examinations. In addition, private laboratories are certified for venereal disease serology if approved by the Wisconsin State Board of Health. Laboratory reports are accepted from other State boards of health laboratories and from Army, Navy, and U. S. Public Health Service laboratories. Wisconsin State forms must be used.

WYOMING

PREMARITAL LAW (Summary)

Applicants for a marriage license must have a physical examination by a licensed Wyoming physician within 30 days of filing the application. This examination must include any standard serologic test for syphilis. The physician must present evidence of a negative microscopic test for the gonococcus.

PRENATAL LAW (Summary)

A physician, or other person permitted legally to attend pregnant women, must submit a sample of blood to an approved laboratory for a standard serologic test for syphilis.

LABORATORY SERVICES (Summary)

Laboratory services furnished include a darkfield examination; spinal fluid examination; and blood serology (qualitative and quantitative). The State laboratory requires no certification for routine venereal disease serology, but must be approved to perform premarital and/or prenatal serology. Reports are accepted from all State board of health laboratories and State branch laboratories; Army, Navy, and U. S. Public Health Service laboratories; New York City and District of Columbia laboratories. Reports are also accepted from the Official Provincial Laboratory of Canada.
